DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-33, drawn to generating objects and simulating draping and collision of the garment, classified in class 700, subclass 135.
 - II. Claims 34-45, drawn to a repository and a compositing rule interpreter, classified in class 345, subclass 420.
2. The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention (I) has separate utility from invention (II) such as in producing an image for a computer-simulated mannequin wearing a garment as defined by selected mannequin and garment parameter values comprising generating objects, simulating draping and collision of the garment as recited in invention (I). Similarly, invention (II) has separate utility from invention (I) such as in a repository and a compositing rule interpreter for displaying the two-dimensional images as cited in invention (II). See MPEP § 806.05(d).
3. A telephone call was made to Kevin Parker on November 13, 2003 to request an oral election to the above restriction requirement, but did not result in a decision.

Art Unit: 2672

4. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
5. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
